

Custom Solutions:

Custom Solutions

At Replico, we've built our reputation on developing innovative, custom solutions for our clients. We leverage our expertise in fulfillment and distribution processes to create a program custom tailored to your business needs. From printing, packaging and production – to inventory management and distribution – we handle it all.

- o Unique packaging and custom printing
- o Unique labeling and product tagging
- o Custom addressed welcome letters for consumer shipments
- o Web pages with specific functionality
- o Web stores with links to customer web site
- o Specific data structures to pass orders between databases
- o Emails to select personnel and groups
- o Different data capture and report structures
- o Immediate and delayed shipments
- o Build on demand vs. build to stock
- o Large inventories and small inventories
- o Ship overnight and ship-to-arrive

To meet a wide variation in customer requirements, Replico must be flexible and adaptable. We have a proprietary database system that can meet the challenge of our clients' needs.

WebShip is:

- A customizable, browser based, web enabled interface
- A data submission and storage system
- A self running, reporting system
- Back office compatible
- Compartmentalized to manage multiple customers
- Available 24/7

We use WebShip to set up custom supply chain and product delivery solutions. Online since 2000 – WebShip offers innovative solutions – that are rapidly customized to meet your every need. Supply chain clients are provided free access and usage of WebShip, 24 hours a day – 7 days a week.

Combining WebShip with the printing and packaging expertise of Replico, allows clients to immediately implement a fully integrated supply chain – to produce and deliver products – start to finish. Our services are reliable, economical – and focused on quality and customer satisfaction.

Please visit our website for case studies of specific examples of Replico's supply chain management solutions.
